Summary

Results-driven **Software Engineer** with a strong foundation in backend development using **ASP.NET technologies**. Experienced in designing and building secure, scalable web applications using **C#, MVC architecture, RESTful APIs, and Blazor**. Adept at writing clean, maintainable code and solving complex technical problems while delivering high-performance solutions. A collaborative team player with strong analytical and problem-solving skills, committed to continuous learning and professional growth. Seeking to contribute technical expertise and development skills to a dynamic engineering team while building reliable and impactful software solutions.

Education

9-Month Diploma, Professional Development & BI Infused CRM, Information Technology Institute (ITI), Tanta Branch	October2025 – July 2025
Bachelor of Communication and Electronics Engineering, Nile Academy, Mansoura, Egypt	2020 – 2025
GPA: 3.4 / 4.0	

Freelancing Experience

ElShark Wood (via Mostaqel)	October 2025 –December 2025
- Developed a high-performance price management system using Blazor and .NET to modernize inventory and pricing workflows. - Delivered a mobile-optimized interface, enabling staff to update real-time product pricing instantaneously from any location. - Successfully eliminated operational delays, ensuring seamless customer service and improved market responsiveness.	

Training Experience

Web Design Scholarship, (NTI), Mansoura	April 2024 – June 2024
.NET Backend Development Internship, (ITI), Shebeen El-Kom	July 2023 - August 2023

Project

PhysioAsist, AI-Powered Physiotherapy Clinic Management System	June 2026 –September 2026
Angular 21 • ASP.NET Core (.NET 10) • SQL Server • Semantic kernel	
- Led an ~8-developer team building a multi-tenant clinic platform covering patient intake, scheduling, clinical documentation, and role-based workflows for doctors and receptionists. - Designed and integrated the AI layer, including retrieval-augmented search, voice-to-text dictation, and intelligent agents for scheduling and clinical summarization, across multiple LLM providers. - Applied modular architecture, secure authentication and authorization, and bilingual Arabic/English localization with RTL support, then deployed the system to production.	
Live Demo	

Angular 21 • ASP.NET Core (.NET 10) • SQL Server

- Developed customer-facing features including product browsing, cart, wishlist, checkout, and order management using Angular 21, ASP.NET Core, Entity Framework Core, and SQL Server.
- Built secure RESTful APIs with JWT authentication, integrated Stripe payments, Cloudinary image management, and implemented real-time notifications using SignalR.
- Applied Clean Architecture, reactive state management (Signals & RxJS), Git, and REST API best practices while collaborating in a three-member Agile team.

WASLA, Smart Delivery & Route Optimization Platform

October 2024 - June2025

ASP.NET Core • SQL Server • AI/RAG

- Developed a scalable backend using ASP.NET Core, SQL Server, Clean Architecture, JWT authentication, FluentValidation, Hangfire, and Serilog.
- Designed and implemented the RCBA (Route Chained Builder Algorithm) to optimize delivery routing based on geographic areas and nearest stations.
- Integrated AI-powered document search using chunking, embeddings, vector search, and Retrieval-Augmented Generation (RAG) to provide intelligent document retrieval.

Skills

1. **Technical Skills:**
 - **Back-End:** C#, SQL, LINQ, Entity Framework, ASP.NET MVC, Razor Pages, RESTful APIs, Blazor, SignalR, gRPC, Design Pattern, Solid Principals, Clean Architecture, Modular architecture
 - **AI:** Semantic Kernel, RAG Pipelines, LLM integrations, Agents, n8n
 - **Front-End:** HTML, CSS, Tailwind CSS, Bootstrap, JavaScript, Responsive Web Design,AJAX, Fetch API, Angular, Signals, TypeScript
 - **Tools & Technologies:** MSSQL, MySQL, WinForms, Node.js, Figma, Git, GitHub, docker, Unit testing
2. **Language Skills:** Arabic Native, English intermediate

Courses

- RESTful API Development using dotnet
- Semantic Kernel
- Building full-stack Ecommerce website using dotnet and angular
